Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of species I, Figures 1a-1d in the reply filed on 7/30/07 is acknowledged. The traversal is on the ground(s) that claims 1-23 and 39-41 were restricted out previously. This is not found persuasive because the basis for the restriction requirement (of 5/01/2007) is the fact that applicant has recited/claimed patentable distinct species within claims 1-23 and 39-41 which have been identified within the office action of 5/01/2007. Applicant may positively establish that they are not patentable distinct species. Consequently, if one embodiment is rejected then all embodiments will be rejected as obvious variances of one another.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 2-9,11-12,14-38 and 40-41 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species or invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 2/12/07 and 7/30/07, respectively.

Information Disclosure Statement

3. The information disclosure statement filed 10/22/03 and 5/28/04 fail to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamashita et al. Yamashita et al. shows a seatback tilt limiter (1,2) for adjustably limiting the recline of a seatback, the seatback tilt limiter comprised of a first rotator (21) with repeating periodic protrusions (23a), the first rotator having a full forward seatback upright endstop and a full recline seatback endstop (as defined by the banana slot 24), and a second rotator (11) with repeating periodic receivers (13a), the second rotator having an adjustment endstop (14), the first rotator periodic protrusions disengagably received by the second rotator receivers, wherein the first rotator is free to rotate between the full forward seatback upright endstop and the full recline seatback endstop when the protrusions are disengaged and not received in the second rotator receivers and the second rotator adjustment endstop limits the rotation of the first rotator to an

adjustable reclined seatback tilt limit when the protrusions are received in the second rotator receivers (see Figs. 4-7).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 10,13 and 39 rejected under 35 U.S.C. 103(a) as being unpatentable over

Yamashita et al. Yamashita et al. shows all of the teachings of the claimed invention.

Consequently, the method steps would have been incorporated within the use of the invention, as taught by Yamashita et al.

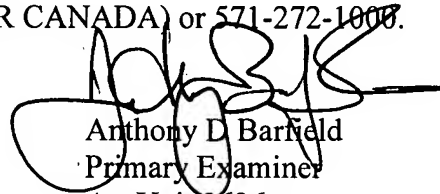

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nos. 4,008,920, 4,614,454 and 5,299,818 show features of the claimed invention.
